NATURAL HEALTH FROM THE ALOE AND THE BEEHIVE

WHEN I THINK ABOUT just why I am involved with Forever, the highest quality of the products and the wonderful ethics of the company are probably the two main reasons that spring to mind. Once again, I am almost overwhelmed with just what Forever does. Honey has been used for thousands of years for its wonderful properties, and now Forever brings us the very best of honeys. We all know about the devastation wrought by recent weather, and how aid is often struggling to get to where it is needed. Again, Forever is at work, bringing help where it is needed. I am proud to be associated with this wonderful company, to be one of its Distributors, and I am keen to do my part in building this company that cares so much about the world in which we all live and sets an example for others to follow. Thankyou, Forever.

Forever Honey here for you

Forever Bee Honey is here, so brighten up breakfast time with our all natural, delicious honey loaded with nature's goodness. Very nutritious, containing approximately 100 calories per 30g, Forever Bee Honey is rich in carbohydrates, calcium and phosphorus. A delicious way to enjoy all the nutritional benefits of honey and give you an instant energy boost to get you going in the morning. Perfect for porridge, toast, pancakes and more. Also great for replacing sugar in your diet.

Bees make honey by travelling from flower to flower, removing the rich nectar, storing it briefly to mix with their enzymes, then depositing the honey in their hives. Throughout the ages, honey has been recognised as a premium natural food – a storehouse of nutritional goodness that is easily digested. Honey contains many healthful substances including natural sugars (glucose, fructose and sucrose), and trace minerals, vitamins, enzymes, proteins and amino acids. Forever Bee Honey is an all-natural, delicious sweetener loaded with nature's goodness. Easily assimilated, Forever Bee Honey is a quick and nutritious energy source for any occasion!

Darker honeys have more nutrients than light ones. The colour of our new mountain honey is a deep amber, due to its richness in minerals. It also has a dominant floral aroma, intense and

It is here at last! Forever Bee Honey

persistent, with certain fruity notes. This exquisitely delicious honey is produced when the Spanish mountains are most densely covered in flowers and the weather is dry. This results in honey that matures slowly in the combs of the hives and has unusually high enzyme and mineral content; amongst the highest of all honeys in the world. We are confident that you will love every spoonful of our new mountain honey.

Forever Bee Honey complements our other bee products: Bee Pollen, Bee Propolis and Royal Jelly. Products from the beehive that have been used for thousands of years. Order yours today!

Bee Pollen, Bee Propolis and Royal Jelly.

The opening of Forever Nutraceutical was a momentous occasion. Cutting the ribbon opened the door to a facility capable of producing all types of health supplements, a research and development laboratory that would be the envy of any pharmaceutical manufacturer, with talented individuals to staff it. The facility itself is state-of-the-art in every way. It provides a future to limitless possibilities. It is a flagship for all the manufacturing world to admire. Forever Nutraceutical is pleased that it will be a significant purveyor of the Forever brand products to Aloe Vera of America, Forever Living Products and their world wide affiliates.

Great thanks to Gregg [Maughan] for his vision and leadership throughout this project. Also, a 'thank you' to the many individuals that have worked tirelessly to make this dream a reality, including Jasmina Kanazir, FN's Director of Quality Management who has worked hard to develop our quality management system, analytical procedures, and process development, and to Margaret Shearl, who by sheer willpower started up operations and provided a seamless transition into production.

We introduced Steve Hatchett as the General Manager of FN. While Steve is new to the Forever family, he brings 20 years of experience in the manufacturing of dietary supplements and he will lead us into the future – a future that looks very bright.

Many thanks to Navaz and Rjay for all their support, past present and future, and a special thanks to Pat Gokie who has overseen the entire construction process, from even before the purchase of the building until today's grand opening. But most of all, thank you to Rex for your vision that has provided for so many, and your commitment to giving the world products of only the finest quality, and a healthy way to live.

Contributed by Chris Hardy, Executive Vice President, Aloe Vera of America

FOREVER LIFELINE – helping others

The recent weather has been causing havoc in many countries. Central Europe, Pakistan and China have suffered from severe flooding. Aid is being sent where it is needed, and Britain is being held up as an example for our generous giving.

Forever, too, have been involved. Poland, Slovakia and Hungary have been seriously affected with water flushing away railways, bridges and roads. The Director of European Operations, Péter Lenky, has told us about how Rex Maughan (Owner and Chairman of the board of Forever) and Aidan O'Hare (Vice President

of Forever Europe) visited Hungary, Turkey and Germany raising donations and organising supplies to be sent to the stricken areas.

Forever Giving is the charitable arm of Forever, and this example is only one of many projects that Forever Giving is undertaking, bringing help to where it is needed. As Péter says, Forever showed once again who we are and what we mean when we say, "The power of Forever is the power of love".

If you would like to donate directly to Forever Giving, please speak to the person whose details are below.
