NATURAL HEALTH FROM THE ALOE AND THE BEEHIVE

**QUALITY COUNTS.** Forever aims to be, not just good, but the very best. I know I can be confident in recommending that you try these products because I know just how much research, development and care has gone into their production. Not only that, but I know they are produced ethically and with care for our environment. Neither the products nor their ingredients have ever been tested on animals (we use our Senior Managers for that!). Knowing that batches of the ARGI+ have been approved for professional sports use only underlines the commitment Forever has to quality. You can be assured that, at whatever level of sport you play, or even none at all, Forever products are there to help you with your health, fitness and wellbeing.

## CHOOSE THE BEST, CHOOSE FOREVER

**W**hatever I choose, I always try to choose the best. I care about my body and my health, so I certainly care about what I put on it and in it. I have selected five of Forever's excellent range of naturally grown products that I use so I can tell you why I use them.

### Aloe Vera Gel

Quite simply, I want to look and feel my best. I have found that drinking Aloe Vera Gel every day is a recipe for good health, wellbeing and a balanced immune system.

### Forever Freedom

I damaged my hip back in 2001, and needed help from an osteopath. Forever Freedom contains glucosamine and chondroitin to help maintain healthy joint function and mobility, so I drink it every day to maintain my joints.

### Aloe Vera Gelly

I keep tubes of this in the kitchen, bathroom and bedroom, and one in my car too. This wonderful

product is 100% stabilised aloe vera gel. It is absorbed into my skin quickly to soothe and calm irritations, and really does help reduce scar formation.

### Aloe Liquid Soap

Whether it is removing oil and grease when I have been working on my car, or dirt from the garden, or for washing away chlorine from my hair and body after swimming, I have found nothing better. I have mild dermatitis through handling chalk as a teacher; this is very moisturising, which feels wonderful!

### FAB

This is the best way I have found to get refreshed and energised, and to stay alert when I start flagging towards late afternoon. With a great refreshing fruit taste, it gives me an energy boost that keeps on going!

Whatever you choose, make sure you choose the best, and you can do no better than to choose from Forever's impressive range.

## ARGI+ Approved

**R**ecently, ARGI+ has joined a host of Forever products that are aligned with the sports and nutrition market. With the list of banned substances in the professional sports market growing all the time, the need has arisen to have Forever products tested and approved, giving the sports person an opportunity to make an informed decision about using these products.

Recently, batches of ARGI+ have been tested for all substances on the doping list, and Forever is proud to announce that these tested batches are free from any banned substances using ISO17025 accredited methods.

Only certain batches have been tested, which have been put in isolation, and which are now available for professional use only. This will allow professional athletes to make an informed choice about taking this product.

If you are a professional athlete and are subject to banned substance testing, and would like to try the Forever ARGI+, please make this clear to the person who gave you this newsletter, who will then place a special order for you from the approved batches. The approved product is not available to purchase online.

Forever is currently seeking certification for Forever Freedom and Aloe Vera Gel to complement the ARGI+ as it is appreciated that professional athletes may wish to seek the benefits gained from these products as well.

## Hydration For Better Health

**F**orever's Cheddar Natural Spring Water is extracted from the spring at source, within the intricate cave network of the Mendip Hills at Cheddar, Somerset. It is crystal clear with a neutral pH and a refreshing natural taste. The neutral pH makes it an ideal complement to both the function of the cells lining the digestive system, and the healthy formation of skin cells.

It is sourced deep in the caves under the Mendip Hills, having been naturally filtered through Soil Association certified organic land and enriched by the rocks through which it travels. No chemicals or fertilisers are used.

2 litres of Forever's Water can provide 33% of your daily requirement of calcium. Water is the most effective natural remover of toxins from our bodies.
