

# Aloe Sunscreen

## Description and Purpose

With today's knowledge of the dangers of over-exposure to the sun, we seek only the highest quality sun protection products available. Aloe Sunscreen provides just that!

Combining modern science with natural ingredients, this effective sunscreen helps to soothe, lubricate, moisturise and protect the skin against sun damage. With SPF 30, Aloe Sunscreen blocks both UVA and UVB rays, while this silky, smooth lotion made with pure stabilised aloe vera gel, rich moisturisers and humectants, maintains the skin's natural moisture balance.

### At a glance...

- Provides high protection against sunburn but still enables you to get a suntan safely
- Gentle yet potent waterproof formulation which retains the SPF up to 40 minutes of activity in water
- Moisturises the skin and helps prolong your tan
- Excellent for children
- Also works as an after-sun – dual action

## Ingredients

ACTIVE INGREDIENTS - Octyl methoxycinnamate, octisalate, oxybenzone, zinc oxide.

OTHER INGREDIENTS -Stabilised aloe vera gel, water, dimethicone, polysorbate 80, C12-15 alkyl benzoate, hydroxyethyl acrylate/sodium acryloyldimethyl taurate copolymer, squalane, glyceryl stearate, cetyl alcohol, glycerin, polysorbate 60, VP/eicosene copolymer, PEG-100 stearate, diazolidinyl urea, methylparaben, propylparaben, xanthan gum, fragrance, tocopheryl acetate.

## Contents

118ml (4fl oz).

## Directions

Apply liberally to all exposed areas 15-30 minutes before exposure to the sun. Re-apply when skin feels dry, or within 40 minutes of any water activity.

## Helpful Information about the Sun and Tanning

- Take sensible precautions to avoid sunburn, particularly in children
- Limit unprotected exposure to solar radiation, especially during the hottest hours between 11am - 2pm
- Seek shade where possible, but remember that sunburn can occur even when in partial shade
- Sunburn can also occur while in water, and can be equally damaging due to the high level of reflected UV radiation off snow or sand
- Cover exposed skin with protective clothing, such as long-sleeved shirts
- Apply sunscreen generously, and re-apply frequently
- Certain prescribed drugs, medicines and cosmetics may make you more sensitive to sunlight
