

Forever Bee Propolis

Description and Purpose

When we think of bees, honey and pollen are foremost in our thoughts. Another important substance, propolis, is a sticky resin collected by bees. Honeybees collect and metabolise the propolis, using it as a sealant for small gaps within the hive. It's so effective, the interior of the beehive is said to be safer than most operating rooms.

As a food, propolis has a 5,000-year old history. The Assyrians and the Greeks used propolis to help maintain good health. Fortified with royal jelly, Forever Bee Propolis is an excellent way to help support the body's natural defences.

Forever Bee Propolis is 100% natural with no added preservatives or artificial colours. It is also an excellent natural food form, providing a wide array of useful elements loaded with nutrients such as vitamins, minerals, enzymes, amino acids, and a rich supply of other elements in trace amounts.

At a glance...

- Natural immune support
- Fortified with royal jelly
- Contains many trace elements
- Helps maintain a healthy respiratory system
