

Rehydrating Toner

Description and Purpose

Rehydrating Toner is a non-drying, non-alcohol formula, containing natural aloe vera and witch hazel, together with special skin moisturisers and plant extracts for toning the skin. It also contains collagen and allantoin for cell conditioning.

Rehydrating Toner is a gentle preparation, used to remove the last traces of cleanser, impurities and dull lifeless surface cells, thus providing good secondary cleansing and toning to reduce pore size. It removes residual oils and dirt whilst invigorating the skin and leaving it clean, smooth, balanced and stimulated. Circulation is also stimulated and rehydration is encouraged as the skin is gently treated.

At a glance...

- Tones and moisturises the skin
- Alcohol-free formula
- Contains aloe vera, witch hazel, plant extracts and collagen

Ingredients

Stabilised aloe vera gel, water, witch hazel (hamamelis virginiana) distillate (non-alcoholic), propylene glycol, soluble collagen, hydrolysed elastin, lemon extract, cucumber extract, horsetail extract, camomile extract, rosemary extract, sodium PCA, sodium lactate, triethanolamine, allantoin, disodium EDTA, diazolidinyl urea, methylparaben, menthol, fragrance.

Contents

118ml (4fl oz).

Directions

Dampen a cotton wool pad with Rehydrating Toner and move gently in an upward, outward motion, being extra careful to avoid contact with the eyes. Continue until no further discolouration of the pad is evident. Your skin should now feel impeccably clean and conditioned, with tightened pores for a smoother appearance.
